

As I tested my website across various browsers like Chrome, Safari, and Firefox, I noticed that they all presented the content quite similarly. For example, when I hovered over the navigation bar, all browsers adjusted by moving the other links to the right. However, I observed subtle differences in how form elements displayed in the different browsers. For example, the form warning notifications for required fields and valid data appeared differently on all browsers.

Safari

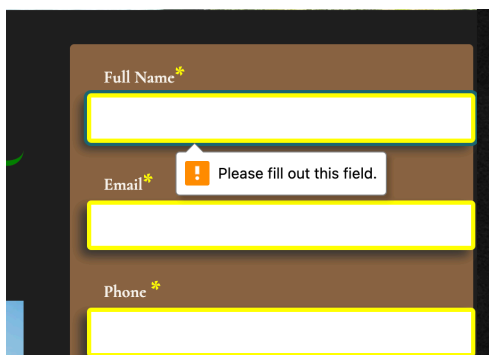

A screenshot of a contact form in the Safari browser. The form has a brown background. The first field is labeled "Full Name*" with a yellow asterisk. A light gray tooltip with the text "Fill out this field" is positioned above the input box. Below it is an "Email*" field, also with a yellow asterisk. The input boxes are white with a yellow border. A small user icon with a dropdown arrow is visible on the right side of the first input box.

Firefox:

A screenshot of a contact form in the Firefox browser. The form is titled "Contact Us" and includes a paragraph of text: "Please reach out to us with any questions or concerns. We are happy to help you plan your dream vacation with us! Required fields marked with an asterisk *". There is a small image of a mountain. The form fields are "Full Name*", "Email*", "Phone*", and "Preferred Contact Method*". The "Preferred Contact Method" field has two radio buttons: "Email" (selected) and "Phone". A light gray tooltip with the text "Please fill out this field." is positioned above the first input box. The input boxes are white with a yellow border.

Chrome

A screenshot of a contact form in the Chrome browser. The form has a brown background. The first field is labeled "Full Name*" with a yellow asterisk. Below it is an "Email*" field, also with a yellow asterisk. Below that is a "Phone*" field, also with a yellow asterisk. A red warning icon with an exclamation mark and the text "Please fill out this field." is positioned above the Email input box. The input boxes are white with a yellow border.
